Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Journal of Geology

Published Semi-Quarterly on or about the following dates: February 1, March 15, May 1, June 15, August 1, September 15, November 1, December 15.

EDITORIAL - 182

REVIEWS: *Structure and Field Geology*, JAMES GEIKIE (W. W. ATWOOD), 187; *The Viscous vs. the Granular Theory of Glacial Motion*, OSWIN W. WILCOX (T. C. C.), 188.

Editorial communications should be addressed to the Editors of The Journal of Geology, The University of Chicago, Chicago, Ill.

Contributors are requested to write scientific and proper names with particular care and in citations to follow the form shown in the pages of the Journal.

Separates, if desired, must be ordered in advance of publication. Separates of leading articles will be printed as ordered, of which 50 (without covers) will be furnished *gratis*, the actual cost of the remainder (and covers, if desired) to be paid for by the author. The table below shows the *approximate* cost of separates consisting of plain text or text with line engravings. The actual cost may vary from the figures given, and will depend upon the amount of work in re-making the pages into forms, press work, paper, binding, etc. Separates containing half-tones may be expected to cost somewhat more than the rates given, the increase depending upon the number of cuts and the amount of work required upon them.

Number of copies	50	100	150	200
Letter-press, for 4 pages or less	$1.30	$1.60	$1.80	$2.00
Letter-press, for 8 pages or less	1.80	2.20	2.50	2.80
Letter-press, for 16 pages or less	3.20	4.00	4.65	5.30
Single plates (1 double=2 single)	.80	1.10	1.35	1.60
Covers, with title (paper like Journal cover) .	1.20	1.69	2.00	2.40

Business correspondence should be addressed to The University of Chicago Press, Chicago, Ill.

Subscriptions, $3.00 per year. Single copies, 50 cents. Postage prepaid by the publishers for all subscriptions in the United States, Canada, Mexico, Cuba, Porto Rico, Panama Canal Zone, Republic of Panama, Hawaiian Islands, Philippine Islands, Guam, Tutuila (Samoa), Shanghai. For all other countries in the Postal Union 89 cents for postage should be added to the subscription price. Remittances should be made payable to The University of Chicago Press and should be in Chicago or New York exchange, postal or express money order. If local check is used, 10 cents should be added for collection.

Claims for missing numbers should be made within the month following that of publication. The publishers expect to supply missing numbers free only when they have been lost in transit.

European subscriptions, 16 shillings (postage included), should be remitted to William Wesley & Son, 28 Essex Street, Strand, London, European agents.

Entered March 20, 1893, at the Post-Office at Chicago, Ill., as second-class matter, under Act of Congress, March 3, 1879.

IMPORTANT BOOKS

THE HISTORICAL BASES OF RELIGIONS

PRIMITIVE, BABYLONIAN AND JEWISH

By HIRAM CHELLIS BROWN. *12mo, cloth; $1.50 net; postage 12c.* A comprehensive summary of the results of modern scholarship and higher criticism. Traces the evolution of the religious sense from primitive races to Christianity and shows under what conditions the Old Testament was compiled. A volume approved by competent critics.

THE BOOK OF ELIZABETHAN VERSE

Chosen and edited by WILLIAM STANLEY BRAITHWAITE, *introduction by* THOMAS WENTWORTH HIGGINSON. *12mo, 800 pages, thin paper, cloth, $2.00 net; full limp morocco, $3.00 net; postage 12c.* The first comprehensive anthology of the greatest period of English poetry. Contains over 700 selections from 124 authors. A beautiful book to see, to read, to own, and to give.

PSYCHICAL RESEARCH

Books by Prof. JAMES H. HYSLOP, PH.D., LL.D., *Vice-President of the Society for Psychical Research. Each volume $1.50 net; postage 12c extra.*

"BORDERLAND OF PSYCHICAL RESEARCH"
treats of Pseudo-Spiritistic Phenomena

"ENIGMAS OF PSYCHICAL RESEARCH"
treats of the supernatural

"SCIENCE AND A FUTURE LIFE"
treats of the scientific investigation of Mediumistic Phenomena

IMPORTANT NEW BOOKS

The New Appreciation of the Bible

By WILLARD C. SELLECK

This book seeks to do three things: first, to state briefly the principal conclusions of modern learning regarding the Bible; second, to show the enhanced values which it now exhibits; and third, to point out some of the ways in which it may be most helpfully used. 424 pages; 12mo, cloth; net $1.50, postpaid $1.63.

The Development of Western Civilization

By J. DORSEY FORREST

An examination of modern European society which has in view the determining of the social forces by which it has been molded to its present form. 418 pages; 8vo, cloth; net $2.00, postpaid $2.17.

A Genetic History of the New England Theology

By FRANK HUGH FOSTER

As the first genetic history of the greatest theological movement which America has yet seen, the book will command the attention of all students of our national thought. 580 pages; small 8vo, cloth; net $2.00, postpaid $2.19.

Quantitative Classification of Igneous Rocks

Based on Chemical and Mineral Characters

With an Introductory Review of the Development of Systematic Petrography in the Nineteenth Century

By WHITMAN CROSS, JOSEPH P. IDDINGS, LOUIS V. PIRSSON, and HENRY S. WASHINGTON

THE BOOK presents in detail the new system of classification and nomenclature proposed by the authors. It contains a series of tables to aid in the calculation of mineral and chemical compositions of rocks, and a glossary of the new terms employed in the nomenclature. Having traced the development of petrography during the past century, the authors discuss the defects of the present system of classification, the basis on which a proper classification must be made, and the construction of the system proposed. The new nomenclature is then presented in full, including magmatic and rock names; and the last part of the book is devoted to methods of calculation, the tables, and the glossary. The book answers a need widely felt among petrologists in the last few years for a new petrographic system into which could be fitted the recent large additions to our knowledge of rocks.

236 pp., 8vo, cloth, net, $1.75; postpaid, $1.91.

A Contribution to the Theory of Glacial Motion

By THOMAS CHROWDER CHAMBERLIN
Head Professor of Geology in the University of Chicago

A SHORT treatise in which are discussed (1) the growth and constitution of a glacier; (2) the arrangement of the crystalline axes; (3) glacial temperatures; (4) the probable fundamental element in glacial motion; (5) auxiliary elements; (6) corroborative phenomena. There are appended a bibliography and twelve half-tone illustrations. **19 pp., 4to, paper, net, 50 cents; postpaid, 53 cents.**

THE UNIVERSITY OF CHICAGO PRESS

Physical Chemistry in the Service of the Sciences

By JACOBUS H. VAN 'T HOFF, *Professor at the University of Berlin*
English version by ALEXANDER SMITH, *Professor at the University of Chicago*

In Four Groups

PHYSICAL CHEMISTRY

as related to

1. Pure Chemistry
2. Industrial Chemistry
3. Physiology
4. Geology

Typical Reviews

The eight lectures presented in this volume have already appeared in German and been noted in this Journal, 24, 1217 (1902). The volume before us is an unusually elegant one, which makes a strong appeal to the booklover as well as the chemist. From the fact, probably, that the lectures were originally given in English, this version reads more smoothly than does the German, and the former possesses a charm which one does not find in the latter.—*Journal of the American Chemical Society.*

This is an extremely readable book, interest being sustained from first to last. The chapters on "Physical Chemistry and Physiology" are particularly interesting, taking up the theories of solution, osmotic pressures, and the specific action of chemical ions in the physical metabolism, the second chapter taking up the subject of enzymes and their effect as catalytic agents tending toward chemical equilibrium. In the chapters on Geology, something of the chemistry of space is discussed, the formation and structure of geological salts, and the influence of heat and variations in temperature upon crystallization. The book will commend itself particularly to teachers and advanced students.—*The Technical World.*

THE MAGAZINE READER'S FRIEND

What's in the Magazines

A Guide and Index to the Contents of the Current Periodicals

Published Monthly by
The Dial Company
Chicago

Price 5 cents a copy
Yearly subscription 50 cents

IN each monthly issue of WHAT'S IN THE MAGAZINES the contents, *for the same month*, of nearly one hundred leading periodicals are classified, indexed, described, and commented upon—all in the simplest and most convenient way imaginable. It makes accessible to the busy every-day reader the entire mass of current periodical literature *as it appears*. Each issue presents a bird's-eye view of the magazines of the month, that will give one in five minutes the information hitherto to be obtained only by long and tedious examination of contents-pages on the news-stands. It is a periodical that brings the other periodicals into a nutshell; and so must prove indispensable to everyone who would keep in touch with current affairs.

A labor and time saving device that promises to attain an almost universal popularity. The multiplication of worthy periodicals within the past few years has meant a serious embarrassment to those who try to keep in touch with current literature, and despair was heretofore the portion of the man who disliked to miss articles of value wherever produced. As a handy guide to the things one needs or desires, WHAT'S IN THE MAGAZINES *is a veritable path through the forest.*

—BROOKLYN DAILY EAGLE.

The value of such a convenient and reliable guide to the magazine literature of the country will be rapidly appreciated by the student, the teacher, the specialist in any field of research, the general reader and the man of affairs. It is a publication that will admirably supplement "Poole's Index" and the "Guide to Periodical Literature."

—DETROIT EVENING NEWS.

So great is the reliance placed upon WHAT'S IN THE MAGAZINES *that the busy man and woman wonders how in the past he did without this valuable little periodical that comes each month and places the contents of the high-class magazines in easy access to the reader. It is not, however, a mere list of contents, nor a complicated index, but each issue presents a bird's-eye view of the magazine contents of the month. Its value to busy men and women is incalculable.*

—MILWAUKEE SENTINEL.

SEX AND SOCIETY

STUDIES IN THE SOCIAL PSYCHOLOGY OF SEX

By WILLIAM I. THOMAS
Associate Professor of Sociology in the
University of Chicago

320 pages, 12mo, cloth; net $1.50, postpaid $1.65

WHILE this subject is one of the most important and fascinating in the field of knowledge, it is recognized that it occupies an unsettled and unscientific position among social-psychological questions. There is little doubt that these studies do more than anything yet published to place the question on a scientific basis.

The comparative method and the genetic standpoint have been used, and the analysis of the historical relation of woman to society and of the social changes which have influenced her status make it possible in the last chapters to discriminate between the points in the character of woman which are innate and those which are adventitious in their character, and to suggest the means by which she may realize herself more completely and naturally. The studies are based both on anthropological-ethnological materials and on personal studies of the writer among various strata of society, and the subject has not before had so frank and at the same time so scientific a handling.

The results presented are a notable contribution, not only to sociological, but to educational theory. The anthropological and ethnological materials used will be new to the general reader, and the book will be of particular interest to intelligent women.

THE CATHOLIC ENCYCLOPEDIA

First Volume Now Ready for Delivery

The completion of the First Volume of the **CATHOLIC ENCYCLOPEDIA** marks the arrival of the most important publication brought out in recent years. For two years the editors of this great work have been actively engaged in collecting material from the foremost Catholic scholars of the world—representing 27 different nationalities; and the importance and newness of the material they have secured is strikingly shown in the completed First Volume.

THE CATHOLIC ENCYCLOPEDIA—as the volume shows—is both interesting and, in a field untouched by any other encyclopedia, *intensely practical.* **For the lawyer** this new work opens up a field of reference concerning civil enactments relating to religious bequests, Church authority, educational foundations, marriage, divorce, wills, testaments, exemptions, etc., that has never been furnished by previous encyclopedias. **For the physician** it furnishes for the first time the means of arriving at a knowledge of the mental habits and beliefs of thousands of his patients, which will prove of greatest value in the practice of his profession. **For the business man** the new reference work gives an insight into the interests of 25,000,000 English-speaking Catholics of the world that is not only serviceable *but profitable.* **For the general reader** this new work of reference supplies a new and authoritative view of the history of the world from the view-point of Catholic influence, Catholic action, and Catholic achievement, of which every well-read man should be master.

THE CATHOLIC ENCYCLOPEDIA

Published under auspices of the Catholic Church

BEARING THE HOUSEHOLD NAME OF APPLETON
